QUALITY CONTROL LAB

Our quality control lab equipment with state of the art testing equipments to perform a wide range of quality control tests.

This includes Systonic spectrophotometer, Brookfield Ametek viscometer, Contech pH meter, Contech conductivity meter, Remi Hot Air Oven, Remi Magnetic Stirrer, Remi Centrifuge etc.

MICROBIOLOGY LAB

Our Microbiology Laboratory have a Comprehensive range of testing Capabilities to assess the microbial testing of cosmetics products.

In Microlab we have Remi BOD Incubator, Remi Stability Chamber, QST Laminar Air Flow, QST Autoclave, Microblue Digital Microscope, HSA Compound Microscope etc.

We keep accurate documentations and records in our microbiology lab.

MANUFACTURING FACILITIES

FULLY AUTOMATIC OINTMENT MANUFACTURING PLANT – 300KG

Descriptions:

- This Fully Automatic ointment manufacturing plant with a capacity of 300kg is a state-of-the-art facility designed for the production of ointments, creams, Shampoo & Conditioners etc.
- It is equipped with advanced Technology, efficient processes, and quality control measures to ensure the high-quality cosmetics production.

OINTMENT MANUFACTURING PLANT – 30KG

Descriptions:

- This ointment manufacturing plant with a capacity of 30kg is a compact and efficient facility designed for the production of Shampoo, Conditioners, Body Lotions and creams etc. on small scale.

PACMAC FULLY AUTOMATIC DOUBLE HEAD TUBE FILLING & SEALING MACHINE

Machine Designation - MAC 150 Lami

Description -

This Tube Filling Machine have the capability of filling about 60,000 tubes in 8 hours with a rated speed of 150 Tubes/Minute and handling a complete variety of tubes.

Combinational Beam is available and capable of closing both Laminated /Plastic and Aluminium Tubes.

Key Features -

- High performance tube filler
- Touch less process
- PLC control system
- Automatic filling system
- Adjustable filling Volume
- User-friendly Interface
- High speed production
- Hygienic production
- Precise sealing mechanism

SIGMA FULLY AUTOMATIC BOTTLE & JAR FILLING MACHINE

Description-

Sigma fully automatic machine is used in bottle and jar filling. Also this induction cap sealing machine have performed continuous duty operations in various industrial applications.

Sigma Cap Seal's Induction Sealers add overall value to your packaging by offering sustainability to the product, convenience to the end user, and a reliable seal.

Key Features -

- High performance Jar filler
- Jar & Bottle cap sealing
- Speed Filling with accuracy
- Automatic filling system

PRINTING FACILITY

DOMINO CIJ Ax150 PRINTING MACHINE

UTILITY AREA

FIRE EXTINGUISHER

Our company is fully protected with Fire Extinguisher System is connected with 90 KLD water storage tank which provides the facilities like fire automatic sprinkler system, fire distribution pipe system, fire hose system, fire suppression system.

THERMAX STEAM BOILER

We Use natural gas as its fuel source to generate steam for heating purpose. Its has various control and softly featured to ensure proper operation. Its has an exhaust system, which may consists of a chimney, to remove the combustion by production.

INGERSOLL RAND AIR COMPRESSOR

The performance of Air Compressor is very good. It delivers sufficient airflow and pressure. It is energy efficient model.

It gives maximize output while minimum energy consumption

RISHABH GEN SET POWERED BY TATA

This gen set is designed to run on natural gas. This gen set is known for its efficiency, reliability and lower emissions compared to diesel-based generators.

This is noise-less and Environmental friendly gen set. Its has advanced control and monitoring Capability.

IOAGPL NATURALS GAS

Our company uses natural gas of IOAGPL for running Gen set and other utility machines. Which reduce CO₂ emissions by up to 60% compared to when coal is used to generate electricity. It is Eco-friendly and highly reliable energy resource.

EFFLUENT TREATMENT PLANT

Our Effluent Treatment Plant (ETP) is a type of waste water treatment method which is particularly designed to purify laboratory waste water. The aim of ETP is to release safe water to the environment from the harmful effect caused by the effluents. Laboratory effluents contain various materials, depending on the experiments performed in the laboratory. Some effluents contain oils and grease, and some contain toxic materials (e.g., cyanide), organic pollutants.

NETAFIM IRRIGATION SYSTEM

Our company used Netafim irrigation system. Netafim is a World Class Israel-based company. NetBow is an innovative user-friendly container irrigation multi-outlet dripper arc with high clogging resistance and superb water distribution across diverse applications. Our NetBow Irrigation System is connected with ETP plant, which is used for irrigation of plant containers, plants & garden area irrigation.

SOLAR SYSTEM

On focusing to save the environment, Sonama Naturals Pvt Ltd installed the solar panel system, which represents a substantial investment in renewable energy infrastructure, providing a significant contribution to reducing carbon emissions and reliance on fossil fuels while harnessing the abundant power of the sun.

We designated 30% green belt area within our company. By implementing 30% green belt, we make a harmonious balance between industrial development and environment preservation. The green belt contributes to the overall well-being of human and environment.
